Reach New Heights in Play with the Crab Trap™ from Landscape Structures

Modern design delivers open-ended play experiences for kids ages 5 to 12

Delano, Minn. (Feb. 14, 2019) — Landscape Structures Inc., a Delano, Minn.-based commercial playground equipment manufacturer, has launched the new Crab Trap™, a unique playstructure that challenges kids ages 5 to 12. With a plethora of opportunities to climb, crawl and hang out, the Crab Trap delivers open-ended play experiences that excite creativity and critical decision-making.

The Crab Trap is sure to keep kids engaged with its limitless climbing routes. In addition to the net climber surround, there are various levels of challenge designed inside the playground structure. With a healthy mix of the O-Zone® climbers, climbing cables, a patent-pending braided belt and more ground-level climbers, the Crab Trap provides visual and tactile interest as well as fresh new experiences.

The Crab Trap delivers a cool aesthetic with a unique mix of materials. I-beams are available in a Hot Dip Galvanized (HDG) finish for a modern look or stay more traditional with the ProShield® finish. And with the addition of playground components using rotationally molded polyethylene, recycled plastic lumber and texture rubber belting, this playground structure becomes a statement piece.

See the Crab Trap in action and learn more about this playground net structure at [playlsi.com](http://playlsi.com).

### **About Landscape Structures Inc.**

Since 1971, Landscape Structures Inc. has been the leading manufacturer of commercial playground equipment in the world. Our employee-owned company designs community and school playgrounds that encourage kids of all ages and abilities to learn persistence, leadership, competition, bravery, support and

empathy through play. We push the limits—of design, inclusion, play—to help kids realize there is no limit to what they can do today and in the future. For a better tomorrow, we play today.
